

Accept the current version after developing it during a 20 year period

- National annexes: stick to what is allowed!
- Don't look back!

CEN decision: stable period until 2015 (no revision in 2010)

Corrections are underway

- marked up documents are available or will be available soon on Livelink

Some amendments are in preparation and will be circulated before summer in the maintenance group

- combined vertical and lateral loading (clarification for use)
- additions/changes due to changes in EN 845-2:Lintels
- reformulation of the limiting shear strength f_{vlt} to a limiting shear force F_{vlt}

Longer term

- annex with an advance shear model ?
- Assessment and retrofitting of existing structures (excluding monumental buildings) ?
