

**EU-RUSSIA COOPERATION
“PARTNERSHIP FOR
MODERNISATION”**

Natalia SAMIKOVA

**Delegation of the European Union to
the Russian Federation**

Partnership for Modernisation (P4M)

Launched on 1 June 2010 at the Russia-EU
Summit in Rostov

P4M: Approximation of EU and Russia's Technical Regulation and Standardisation Systems

Objectives of the project:

- Approximation with the EU regulatory framework and infrastructure on market surveillance for industrial goods
- Approximation of conformity assessment procedures following the modular approach, designation of conformity assessment bodies and further approximation of legal metrology system
- Approximation with EU legislation in defined product areas
- Support to the EU – Russia regulatory cooperation through the Regulatory Dialogue established under the Common Economic Space roadmap.

P4M: Approximation of EU and Russia's Technical Regulation and Standardisation Systems

- Contracting Authority: EU Delegation to the Russian Federation
- Project Partner: The Ministry of Industry and Trade of the Russian Federation (MIT)
- Contractor: European Profiles S.A (lead Partner)
- Implementation period: 1/01/2013 – 31/12/2015

P4M: Approximation of EU and Russia's Technical Regulation and Standardisation Systems

Stakeholders:

- Ministry of Economic Development
- Ministry of Regional Development
- Federal Agency for Technical Regulating and Metrology Russian
- Federal Accreditation Service
- Federal Service for surveillance of consumers' rights protection and human wellbeing (Rospotrebnadzor)
- Federal Highway Agency
- Russian Union of Industrialists and Entrepreneurs (RSPP)
- Association of European Business (AEB)

P4M: Approximation of EU and Russia's Technical Regulation and Standardisation Systems

Construction Sector:

Analysis and recommendations on approximating with the EU legislation and standards, covering in particular the following aspects:

- A system of codes and methods of calculation following the approach of Eurocodes
- Transitional policies

Thank you for your attention!

•Part 3 A System of Harmonised technical specifications

- Number of Issued harmonised technical specifications (CPD related)

- Harmonised Specification Number issued
- Cat A. Eurocodes 10 areas, 58 parts, 15 packages
- Cat B. Harmonised Product ENs 606
- ETA Guidelines 58
- ETA without Guidelines 614
- Other CEN construction standards
 - The Construction Sector is the biggest single area of work in CEN with about 3000 work items, both product standards and test methods. Of these about 600 standards will be harmonized under the CPD along with about 1500 supporting standards (test methods/Evaluation of Conformity).
 - CPD Standards currently under preparation or revision are listed at:
<http://www.cen.eu/cenorm/sectors/sectors/construction/snapshotjune2009.pdf>
 - [CPD Mandates for standards](#)

Transposition of CPD framework and legislation

- Key requirements of infrastructure for recognition by EU

Field		Examples of Requirements
Standardization		<p>Standards are of a voluntary status</p> <p>An independent standardization body having a transparent decision-making process based on a consensus principle</p> <p>Representation of all parties concerned by the standardization activity</p> <p>Participation in the international (ISO, IEC) and the European (CEN, CENELEC, ETSI) standards bodies.</p>
Accreditation		<p>An independent and non-profit national accreditation body</p> <p>One national body only</p> <p>Cooperating with European accreditation bodies (European Accreditation (EA))</p>
Assessment of the conformity to statutory requirements		<p>Conformity assessment bodies (CAB), preferably accredited ones</p> <p>Competent, independent and impartial CABs</p> <p>The CABs shall be the object of surveillance</p>
Metrology		<p>A body in charge of metrology</p> <p>Taking part in the work of international or European bodies (example: OIML)</p>
